EMBASSY OF THE REPUBLIC OF THE PHILIPPINES  
ANKARA, TURKEY

PHL-248-2021

The Embassy of the Republic of the Philippines presents its compliments to the Ministry of Foreign Affairs of the Republic of Turkey and has the honor to forward a copy of Note No. 21-4527 issued by the Department of Foreign Affairs to Diplomatic Missions accredited in Manila on 31 August 2021, as attached, concerning the following:

APG4  
10/6

- a. The new format of the International Certificate of Vaccination or Prophylaxis (ICVP), also known as "Carte Jaune" or "Yellow Card" in furtherance of commitments under -- and as compliant with the prescribed format of, the International Health Regulations (IHR) of the World Health Organization (WHO) to be used as a proof of vaccination for travellers who are fully vaccinated against COVID-19 in the Philippines;
- b. The commencement of the official use of the Digital Vaccination Certificate (DVC) under the VaxCertPH system of the government. Issued to persons inoculated specifically with the COVID-19 vaccine in the Philippines, the VaxCertPH may be carried by persons within, and travelling outside, the Philippines.

The Embassy has the further honor to request assistance from the Ministry in facilitating the Embassy's further consultations and coordination with relevant Turkish authorities on the issuance of ICVP and the digital Vaccination Certificate referred to as VaxCertPH, to persons travelling outside the Philippines, with a view that these certificates could be considered by them for current or future arrangements and possible reciprocal and mutual recognition of COVID-19 vaccine certification.

The Embassy of the Republic of the Philippines avails itself of this opportunity to renew to the Ministry of Foreign Affairs of the Republic of Turkey the assurance of its highest consideration.

Ankara, 8 September 2021

Ministry of Foreign Affairs  
Republic of Turkey  
ANKARA

REPUBLIC OF THE PHILIPPINES  
DEPARTMENT OF FOREIGN AFFAIRS  
MANILA

Note No. 21- 4527

The Department of Foreign Affairs of the Republic of the Philippines presents its compliments to all the Diplomatic and Consular Missions accredited to the Philippines and has the honor to convey the following:

1. As of 15 July 2021, the new format of the International Certificate of Vaccination or Prophylaxis (ICVP), also known as "Carte Jaune" or "Yellow Card" is being utilized by the country and as compliant with the prescribed format of the International Health Regulations (IHR) of the World Health Organization (WHO). The certificate is being issued by the Bureau of Quarantine which is under the Department of Health to travelers who have been vaccinated in the Philippines with internationally regulated vaccines (i.e. for yellow fever, polio, and measles etc). Even prior to the COVID-19 pandemic, the ICVP is being issued in compliance with the country's commitment in the IHR. Currently, it is also being utilized as a proof of vaccination for travelers who are fully vaccinated against COVID-19. The ICVP can be further verified online (<https://icv.boq.ph/>) and machine readable with corresponding two-dimensional quick response code. On security implementation, the system is ready to connect and authenticate private keys once the WHO is able to host public keys and provide the corresponding application programming interfaces (API). Further details and a sample of the ICVP is enclosed herewith under Annex A.
2. Moreover, on 03 September 2021, and aside from the issuance of the ICVP as a proof of vaccination for COVID-19, the official use of the Digital Vaccination Certificate (DVC) or VaxCertPH system will commence. The DVC or VaxCertPH is also issued by the Department of Health -- and developed with the Department of Information and Communications Technology, to all persons inoculated specifically with the COVID-19 vaccine in the Philippines. The VaxCertPH may be carried by persons within, and travelling outside, the Philippines. Furthermore, being verifiable online and machine readable with a secured two-dimensional quick response code, the VaxCertPH is ready to implement a public-key cryptography system - access to which may be further arranged with border control and quarantine authorities of receiving states and territories. Additional details and a sample of the DVC is attached as Annex B.
3. The foregoing certificates align with the implementing guidelines of the World Health Organization (WHO) Digital Documentation of COVID-19 Certificates: Vaccination Status (DDCC:VS) specific to COVID-19 certificate of vaccination status and to facilitate the implementation of a global certification process. The certificates may be presented in both physical and digital formats.
4. In this regard, the Department requests the kind assistance of the missions in transmitting the foregoing information to the relevant authorities and instrumentalities of their respective governments with a view that it could be considered by them for current or future arrangements -- and in furtherance of the possible reciprocal and mutual recognition of COVID-19 vaccine certification.

5. Furthermore, the Department would highly appreciate it if the missions could kindly seek acknowledgement of the abovementioned documents from their respective relevant authorities, as well as identify – and advance further coordination between, focal agencies and persons concerned with their Philippine counterparts to facilitate the option of the exchange of public and private keys for the verification of certificates concerned.

The Department of Foreign Affairs avails itself of this opportunity to renew to all the Diplomatic and Consular Missions the assurances of its highest consideration.

Manila, 31 August 2021

Z-2021/21364333-APGY/33267661

Türkiye Cumhuriyeti Dışışleri Bakanlıđı, Filipinler Cumhuriyeti Büyükelçiliđi'ne saygılarını sunar ve Büyükelçiliđin 8 Eylül 2021 tarihli ve PHL-248-2021 sayılı Notası'na atıfla, Filipinler makamları tarafından ita edilen, "Yellow Card" / ICVP ve "VaxCertPH" isimli Kovid-19 aşı sertifikalarının Türkiye Cumhuriyeti makamlarınca tanındığını bildirmekten şeref duyar.

Türkiye'ye girişlerde sadece Türkiye Cumhuriyeti sađlık makamlarınca acil kullanım onayı verilen ve/veya Dünya Sađlık Örgütü tarafından onaylanan aşılar, Filipinler tarafından ita edilen sözkonusu aşı sertifikalarıyla belgelendirilmesi halinde kabul edilecektir.

Bu bağlamda Bakanlık, karşılıklılık çerçevesinde, işbu Nota'ya cevaben Türkiye Cumhuriyeti yetkili makamlarınca düzenlenen örneđi ekli aşı sertifikalarının da Filipinler Cumhuriyeti tarafından tanındığının bildirilmesini rica eder.

Türkiye Cumhuriyeti Dışışleri Bakanlıđı bu vesileyle Filipinler Cumhuriyeti Büyükelçiliđi'ne en derin saygılarını yineler.

Ankara, 20 Eylül 2021

BKM?

"2021 – Año de Homenaje al Premio Nobel de Medicina Dr. César Milstein"

Embajada  
de la  
República Argentina

SECON NOTA N.E. No: 15/2021

The Embassy of the Argentine Republic presents its compliments to the Ministry of Foreign Affairs - Directorate General for Consular Affairs (KOGM) - and has the honor to convey information regarding the format and specifications of the "DIGITAL VACCINATION CERTIFICATE" provided by the Argentine Ministry of Health in relation to the Argentine National Vaccination campaign. Regarding this, the Embassy has the honor to convey the link in which the information about the "DIGITAL VACCINATION CERTIFICATE" can be obtained:

KOGM  
AUG 16/9

[https://www.argentina.gob.ar/miargentina/servicios/vacuna\\_covid](https://www.argentina.gob.ar/miargentina/servicios/vacuna_covid)

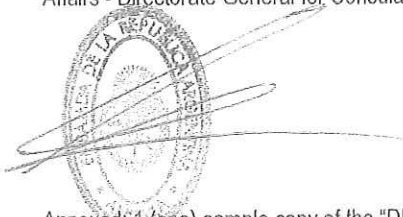

In addition to this, we would like to mention that on the 06<sup>th</sup> of September 2021, the "DIGITAL VACCINATION CERTIFICATE" became operational for those who have been vaccinated in Argentina in bilingual format (Spanish / English), in order to be can be presented abroad by those nationals and residents who must travel internationally. Furthermore, this digital document is verifiable by means of a QR code, which specifies its content, the scope of the aforementioned certificate, the applicable legal framework and the details of the data it contains, as it comes from the Federal Register of Nominal Vaccination (NOMIVAC).

It should be noted that the Digital Vaccination Certificate is accessible in the "Mi Argentina" phone application and it is validated through a unified national registry, between the systems of the Ministry of Health and the National Registry of Persons. Likewise, the possibility of consulting with the corresponding authorities regarding its content in general or in particular is available.

This Embassy would highly appreciate if the distinguished Ministry could convey the above mentioned information to the relevant Turkish authorities.

The Embassy of the Argentine Republic avails itself of this opportunity to renew to the Ministry of Foreign Affairs - Directorate General for Consular Affairs (KOGM)-, the assurances of its highest consideration.

Ankara, 16<sup>th</sup> of September 2021

Annexed: 1 (one) sample copy of the "DIGITAL VACCINATION CERTIFICATE"

Türkiye Cumhuriyeti Dışışleri Bakanlıđı, Arjantin Cumhuriyeti Büyükelçiliđi'ne saygılarını sunar ve Büyükelçiliđin 16 Eylül 2021 tarihli ve 15/2021 sayılı Notası'na atıfla, Arjantin makamları tarafından ita edilen "DIGITAL VACCINATION CERTIFICATE" isimli Kovid-19 aşı sertifikaları ve aşı kartlarının Türkiye Cumhuriyeti makamlarınca tanındıđını bildirmekten şeref duyar.

Türkiye'ye girişlerde sadece Türkiye Cumhuriyeti sađlık makamlarınca acil kullanım onayı verilen ve/veya Dünya Sađlık Örgütü tarafından onaylanan aşilar, Arjantin tarafından ita edilen sözkonusu aşı sertifikaları ve aşı kartlarıyla belgelendirilmesi halinde kabul edilecektir.

Bu bağlamda Bakanlık, karşılıklılık çerçevesinde, işbu Nota'ya cevaben Türkiye Cumhuriyeti yetkili makamlarınca düzenlenen ekli aşı sertifikaları ve aşı kartlarının da Arjantin Cumhuriyeti tarafından tanındıđının bildirilmesini rica eder.

Türkiye Cumhuriyeti Dışışleri Bakanlıđı bu vesileyle Arjantin Cumhuriyeti Büyükelçiliđi'ne en derin saygılarını yineler.

Note No. 119 / 2021

KOGY  
APGY  
16/9

The Australian Embassy presents its compliments to the Ministry of Foreign Affairs of the Republic of Turkey and has the honour to advise that, from October 2021, the Australian Government will be issuing an International COVID-19 Vaccination Certificate to outbound travellers.

To ensure a high level of integrity and global interoperability, the certificate complies with World Health Organization and International Civil Aviation Organization (ICAO) requirements. It is secured against forgery with a Visible Digital Seal (VDS). VDS is the QR code format ICAO has specified for cross-border air travel.

Vaccination information in the certificate is drawn from the Australian Immunisation Register, the official national database of vaccinations recorded in Australia.

The certificates will be available to Australians and foreign nationals who have been immunised through Australia's vaccine roll-out.

Attached to this note are four official specimen certificates, together with background information about their features and how authorities can authenticate them.

The Australian Embassy avails itself of this opportunity to renew to the Ministry of Foreign Affairs of the Republic of Turkey the assurances of its highest consideration.

16 September 2021

## Australia's International COVID-19 Vaccination Certificate

From October 2021, the Australian Government is issuing an **International COVID-19 Vaccination Certificate** to outbound travellers.

Information in the certificate comes from the **Australian Immunisation Register**, the official database of vaccinations recorded in Australia. The certificate will be available to **Australian and foreign passport holders** alike.

For protection against forgery, the certificate uses a Quick Response (QR) code known as a **Visible Digital Seal (VDS or VDS-NC)**. The International Civil Aviation Organization (ICAO) has specified VDS as its standard for health certificates for cross-border air travel. The World Health Organization has endorsed the format. VDS is highly secure and globally interoperable, because like the hundreds of millions of ePassports on issue around the world it uses ICAO public-key infrastructure.

### *What's in the certificate?*

Included with this information sheet are **official specimens**. They illustrate four of many possible vaccination scenarios that are consistent with the ICAO standard and with vaccination practice in Australia. Each one has:

- the Australian Government **crest**, centred at the top
- the **title**, "International COVID-19 Vaccination Certificate"
- a **header row** containing:
  - the words "Proof of Vaccination"
  - the **issuing state** ("AUS")
  - the **version number** ("1")
  - a **Unique Vaccination Certificate Identifier (UVCI)**
- the **VDS QR code**, containing all the data elements, as well as signature information for authenticating the certificate
- the holder's **name**, in capitals, with family name first
  - long names wrap onto a second line
  - because of space constraints, the name in the VDS QR code may be shorter than what appears in the plain-English text of the printable PDF
  - the names (and other biodata) in the specimens are fictitious
- **date of birth**, in the format YYYY-MM-DD
- **gender** ('Sex'), given as "M", "F" or "X"
- the holder's **passport number**
  - the numbers in the specimens are from Australian passport specimens
- **vaccination history**, which includes, for each type of vaccine administered, ("Vaccination event") the brand, date, batch number, administering centre and country of each dose
  - the manufacturer name is included in the vaccine brand name
  - the "Dose number" is in chronological order across Vaccination events
- a note at the end explaining abbreviations and codes in the certificate.

### ***Is the certificate valid in both paper and digital form?***

Yes. Travellers receive the certificate as a **PDF**, from which they may load the QR code into a digital wallet or a travel app. Because it contains all the information in the PDF and can be authenticated, the QR code is valid by itself as a digital vaccination credential.

### ***Can someone have more than one certificate?***

There's no limit to the number of valid certificates an individual may hold, for instance if they have **concurrent passports** or passports that reflect **dual nationality**.

### ***How can I tell if the holder is fully vaccinated?***

VDS health certificates don't contain a statement about whether the holder is fully vaccinated. They simply record the holder's **vaccination history**. Whether that history satisfies current health policy is a matter for authorities in countries the traveller visits.

For this reason, VDS health certificates may sometimes only list one dose of a two-dose vaccine.

### ***Where's the expiry date?***

VDS health certificates have **no expiry date** because they make no time-sensitive assessment of whether the holder is fully vaccinated. They simply record the holder's vaccination history. Holders who have further vaccinations can get a new certificate, but the first certificate is not cancelled.

### ***What are the specifications?***

Australia's international certificate complies with the ICAO [specifications](#) for Visible Digital Seals for Non-Constrained Environments (VDS-NC), version 1.1. Australia would be glad to assist any country interested in technical advice on how to meet the specifications and issue VDS certificates.

### ***What does it mean that I can verify the document against Australia's ePassport country key?***

Country Signing Certificate Authority (CSCA) public keys are the root of trust for ICAO's public-key infrastructure, which underpins the ePassports issued by more than 140 countries worldwide. CSCA public keys are available from the [ICAO Public Key Directory](#) and the [German Master List](#). Australia's is also published on the Australian Passport Office [website](#).

Taking advantage of these keys, authorities can use **passport reading machines** at borders and **QR apps** on mobile devices to authenticate – to the same very high level of confidence as a passport chip – that a VDS QR code was written by the purported issuing authority and has not been altered.

### ***How do I upgrade my passport readers? Where do I find QR apps?***

As a rule, passport readers can natively read QR codes. To process VDS, they require relatively minor software updates. Australia has been liaising with industry to make these updates available as soon as possible. We recommend border authorities contact their providers to follow up on this.

It is not hard for suppliers to configure existing government and private sector QR apps, including apps developed for other vaccination certificate formats, to read and authenticate VDS QR codes. New apps with VDS functionality will also emerge as countries begin to adopt the standard.

To ensure there are no gaps in the meantime, the Australian Passport Office has published a simple, free app of its own, called "**VDS-NC Checker**". The app is available in the Apple store. An Android version will be available on or before 27 September in the Google Play store (for devices with a QR reading capability). The app will work if you try it out on the specimens.

## The VDS-NC Checker app

### ***What is VDS-NC?***

The International Civil Aviation Organization (ICAO) has [specified](#) Visible Digital Seals as its standard for cross-border digital health certificates, including COVID-19 vaccination and testing certificates. The World Health Organization has endorsed the standard.

ICAO first developed Visible Digital Seals in 2016. The European Union has proved the technology by using it on Schengen visas. In May 2021, ICAO adapted the standard for use in health certificates. To avoid confusion between visa and health uses, the official name of the health standard is 'Visible Digital Seals for Non-Constrained Environments' or **VDS-NC**.

VDS-NC certificates are **secure and interoperable**. They:

- leverage the **ePassport public key infrastructure (PKI)** that ICAO member states around the world have been using since 2004
- are like a passport chip in QR format, with the same high level of **security against forgery**
- can be **authenticated offline**, using keys available from the [ICAO Public Key Directory](#) and other published Master Lists, such as the [German Master List](#)
- comply with **World Health Organization** guidance on digital secure vaccination certificates
- are compatible with digital wallets and COVID-19 travel apps such as the **IATA TravelPass**.

Because VDS-NC uses the same ICAO PKI as ePassports, it will be simple for suppliers to update passport reader software and QR apps to process VDS-NCs. But because the standard is new, not all suppliers have made these changes. To fill any gaps, and ensure that no authority is without the capacity to process VDS-NCs, the Australian Passport Office has developed the VDS-NC Checker app.

#### ***What does the app do?***

The app uses ICAO PKI to authenticate whether a 2D barcode under inspection:

- is a VDS-NC
- was written by the purported issuing authority
- is unaltered.

If the answer to all these questions is yes, then the QR code is an **authentic VDS-NC**.

If the VDS-NC is authentic, the app displays the most important information from the certificate, including the holder's biodata and COVID-19 immunisations. There's also an option to view the **full set of data** on the certificate.

If the QR code is **not a VDS-NC**, or if it's **not authentic**, the app displays a message to that effect:

***Is the app just for Australian certificates?***

While the initial release authenticates vaccination certificates issued by Australia, future updates will authenticate VDS-NCs issued by **all other VDS-NC issuing countries**.

***Does the app tell me if a person is fully vaccinated?***

No, it shows the **vaccination history** so that **you** can judge if the holder is fully vaccinated.

That's how the VDS-NC standard is meant to work. It leaves decisions in the hands of inspecting authorities in the **receiving** state, not the **issuing** state.

***What about privacy?***

The app has very strong privacy restrictions. It collects no personal information from you – there's no login or password. You don't have to enter your email address or phone number. And the app doesn't store or transmit any of the information it reads from VDS-NCs.

More information is in our [Privacy statement](#).

# Australian Government

## International COVID-19 Vaccination Certificate

Proof of Vaccination

Issued by AUS

Version 1

UVCI VB0009990025

Name of the holder: **CITIZEN, JOHN**  
Date of birth: **2004-03-20**  
Sex: **M**  
Passport number: **PA0940385**

**Visible Digital Seal (VDS-NC)**

Authorities can verify that this document is true and unaltered with a QR reader that checks against Australia's ePassport Country Signing Certificate Authority public key.

Protect the QR code from marks and damage

**VACCINATION EVENT**

Vaccine or prophylaxis:  
**XM68M6 (COVID-19)**

Vaccine brand:  
**AstraZeneca Vaxzevria**

Disease or agent targeted:  
**RA01.0 (COVID-19)**

Date of vaccination:	Dose number:	Country of vaccination:	Administering centre:	Vaccine batch number:
2021-04-02	1	AUS	Community Nurse	317711P

**VACCINATION EVENT**

Vaccine or prophylaxis:  
**XM68M6 (COVID-19)**

Vaccine brand:  
**Moderna Spikevax**
